

Town Of Coventry, CT - Manager's Office

May 16 at 2:50 PM · 🌐

At the Connecticut Education Network's 2022 Member Conference earlier this morning, I was honored to be one of the recipients of a 2022 Outstanding Leadership Award.

Connecticut Education Network (CEN), was established in 2000 and serves as Connecticut's 'Trusted Internet Partner,' supplying high-performance and high-capacity Internet, value-added services to schools, colleges and universities, libraries, state and municipal governments, healthcare, research, and open access institutions.

CEN and the Public Safety Data Network (PSDN), combine to create the 'Nutmeg Network' connecting over 1000 points of presence across the state and providing service to community anchor institutions through resilient, flexible, fiber-based, high-performance networks. PSDN, established in 2009, serves as the primary provider of a secure, closed communication network, connecting first responders to statewide services such as E911, COLLECT, and radio 'P25' system. This unique partnership allows the State of Connecticut to provide unparalleled connectivity to community anchors. Directly-connected PSDN entities, including police, fire, and municipal governments, can gain access to CEN's high-performance service through their existing PSDN connection where capacity allows.

I am proud to serve in a leadership role in this outstanding initiative.
